

TALENT GRAPH

Full Platform Documentation

World-Class Football Intelligence Platform

Version 2.0 | Kenya-First, Global-Ready | Confidential

PART 1 — PLATFORM VISION & DESIGN PRINCIPLES

What Talent Graph Must Feel Like

When a scout at AFC Ajax opens the platform, it must feel as credible as Wyscout.

When a coach at Gor Mahia opens it, it must feel built specifically for them.

When a 17-year-old striker in Kisumu opens their profile, it must feel like the most important page they have ever owned.

The platform wins by being three things simultaneously:

- The most trusted source of verified African football data
- The simplest tool a Kenyan coach has ever used
- The most powerful discovery platform a global scout has ever seen

Design Language (For Engineers & Designers)

Aesthetic: Industrial precision meets African football energy

Color palette: Deep navy #0A0E1A (background)

Surface dark #111827

Surface mid #1C2333

Border #1E293B

Green accent #00C853 (verified, success, active)

Amber accent #FF6D00 (alerts, scout actions)

Red #EF4444 (risk, danger)

White #F9FAFB (primary text)

Muted #94A3B8 (secondary text)

Typography: Display: Bebas Neue or Barlow Condensed (headings, scores)

Body: DM Sans or Plus Jakarta Sans

Mono: JetBrains Mono (stats, scores, data)

Motion: Subtle. Score counters animate up on load.

Cards slide in staggered on page load.
Verified badge pulses once on appearance.
No carousels. No bouncing. No clutter.

Mobile first: Every screen designed for a 390px phone first.
Desktop is an enhancement, not the primary.

PART 2 — USER ROLES & THE COMMUNICATION ECOSYSTEM

The Five Roles

How Every Role Connects to Every Other Role

From → To	Athlete	Coach	Analyst	Scout	Club Admin
Athlete	—	Request verification, reply to coach messages	Share stats for analysis	Accept/decline scout requests, reply to DMs	Apply to club
Coach	Verify stats, send squad invite, message	Collaborate on match data	Share match reports	View scout requests on their athletes	Report to club admin
Analyst	Analyze athlete data	Share performance reports	—	Provide data insights	Report to club admin
Scout	Send request, send DM	View coach-verified data	Request analysis reports	—	Contact club for trials
Club Admin	View squad athletes	Assign coaches, receive reports	Assign analysts	Respond to trial enquiries	Manage full club

PART 3 — COACH DASHBOARD (FULL SPECIFICATION)

Overview

The coach dashboard is the data engine of the platform. Everything a scout sees, everything an athlete is judged by, originates here. It must be fast, reliable and designed for someone entering data on a phone at the side of a pitch.

Coach Sidebar Navigation

- Overview
- My Squad
- Verify Athletes ← badge shows pending count
- Match Entry
- Training & Drills
- Schedule
- Performance Analytics
- Communications ← unified inbox
- ■ Club Dashboard
- ■ Settings

COACH FEATURE 1 — Overview Dashboard

Purpose

The first thing a coach sees after login. A single-screen command centre showing everything that needs attention today.

Layout (Mobile-First)

Top bar:

- Coach name + club badge
- Notification bell with unread count
- Quick action button: "+ Add Match Result"

4 stat cards (2x2 grid):

[Squad Size: 24] [Pending Verifications: 3]
[Matches This Month: 6] [Next Session: Tomorrow 4PM]

Pending Verifications strip:

- Shows up to 3 athletes awaiting verification with one-tap "Verify Now" button
- If 0 pending: shows "All athletes verified ■"

Recent Activity Feed (last 10 items):

- You verified James Otieno's match stats 2h ago
- You entered Nairobi City vs AFC Yesterday
- Brian Wafula joined your squad 2 days ago
- Performance scores updated for 18 athletes 3 days ago

Upcoming Schedule widget:

- Next 3 events (matches + training)
- Tap to view full schedule

Squad Performance Snapshot:

- Average composite score (number + trend arrow)
- Top performer this week (name + score)
- Most improved this month (name + score change)
- Flagged athletes (High/Very High risk — tap to view)

Firestore Reads on Load

```
// Parallelise all reads
const [squad, pendingVerifications, recentMatches,
      upcomingSchedule, performance] = await Promise.all([
  getSquadSummary(coachId),
  getPendingVerifications(coachId),
  getRecentMatches(coachId, limit=5),
  getUpcomingEvents(coachId, limit=3),
  getSquadPerformanceSnapshot(coachId)
])
```

COACH FEATURE 2 — My Squad

Purpose

Complete view and management of every athlete under this coach.

The source of truth for who is in the squad.

Squad List View

Search + filter bar:

- Search by name
- Filter by: position, verification status, risk band, actively looking

Table columns:

[Photo] [Name] [Position] [Age] [Composite] [Status] [Risk] [Actions]

Status badges:

- ■ Coach Verified (green)
- ■ Self Reported (amber)
- ■ Reverification Needed (red — athlete edited after verification)

Risk badges:

- ■ Low Risk
- ■ Moderate Risk
- ■ High Risk
- ■ Very High Risk

Actions per row:

- View Full Profile
- Enter Match Data (quick link)
- Verify Stats

- Message Athlete
- Remove from Squad

Empty squad state:

- "Your squad is empty. Search for athletes to add them."
- Search button that opens athlete search

Add Athlete to Squad Flow

Coach clicks "Add Athlete"

- Search modal opens
- Coach searches by name or location
- Finds athlete, clicks "Send Squad Invite"
- Athlete receives in-app notification + SMS:
"Coach [Name] from [Club] has invited you to join their squad on Talent Graph.
Accept: talentgraph.co.ke/invites"
- Athlete accepts or declines
- On accept: athlete added to squad, coach notified instantly

Squad Statistics Summary (bottom of page)

Total players:	24
Verified:	19 (79%)
Self-reported only:	5 (21%)
Average age:	21.4
Average composite:	67.2
Positions covered:	GK×2, CB×4, LB×2...

COACH FEATURE 3 — Athlete Verification (Automated Flow)

Purpose

The trust backbone of the platform. Verified data is worth more.

This feature makes verification fast, auditable and automated.

Coach Verification Access (One-Time Setup)

When a coach registers, they submit a verification access request:

Form fields:

Full name
Club affiliation
Years coaching experience
Coaching licence number (optional but recommended)
Upload: coaching licence photo (optional)
Brief statement (why you should have verification rights)

Admin reviews in admin portal (one-click approve/reject)

Once approved:

- verificationRights: true set on user document
- Coach notified via SMS:

TalentGraph: Your coach verification access has been approved. You can now verify

athlete stats on your squad.

Verifying an Athlete's Stats

Step 1: Coach sees athlete row in squad with  badge and "Verify" button

Step 2: Verification modal opens showing:

- Athlete photo, name, position
- All self-reported stats in a review table
- Each stat has: current value, input field to correct if wrong, approve checkbox
- Coach can approve all at once or correct individual stats before approving

Step 3: Coach clicks "Confirm Verification"

Step 4: System writes:

```
verifications/{verificationId} {  
  athleteId,  
  coachId,  
  coachName,  
  clubId,  
  statsSnapshot: { ...allVerifiedStats },  
  corrections: [ { field, oldValue, newValue } ],  
  verifiedAt: serverTimestamp(),  
  notes: ''  
}
```

Step 5: Athlete profile updates:

- Badge changes:  Self Reported →  Coach Verified
- Verified coach name displayed on public profile
- Performance scores recalculated using verified data

Step 6: Athlete notified:

TalentGraph: Your profile has been verified
by Coach [Name] at [Club]. Your stats now
carry the Coach Verified  badge.
Scouts can now see your trusted data.

Re-verification Trigger

If an athlete edits any verified stat after verification:

- Badge reverts to  Reverification Needed
- Coach notified: "James Otieno has updated their stats."

Re-verification required."

- Coach can review changes and re-verify or reject the edit

Verification Audit Trail

Every verification is permanently stored and visible to:

- The athlete (on their profile)
- The coach (in their verification history)
- Scouts (on the athlete profile — shows who verified and when)
- Admin (full audit log)

This audit trail is a key partnership asset for FKF, CAF and international clubs who need data provenance.

COACH FEATURE 4 — Match Data Entry

Purpose

Fast, mobile-optimised data entry at the side of the pitch or after a match. The primary data source for all performance calculations.

Entry Flow

Step 1 — Match Header

Competition: [text input – e.g. NSL Round 12]
Date: [date picker]
Opponent: [text input]
Home / Away: [toggle]
Final Score: [Our goals] - [Opponent goals]

Step 2 — Player Selection

- Shows full squad list with checkboxes
- Coach selects who played (or "Select All")
- Quick position filter to find players fast

Step 3 — Per Player Stats Entry

For each selected player, a compact card shows:

[Player photo] James Otieno – ST

Apps: [1] Minutes: [82] Rating: [7.5]
Goals: [1] Assists: [0] Shots: [4]
Duels Won: [6] Fouls: [2]
Yellow: [0] Red: [0]
Saves: [–] (only shown for GK)

Mobile UX consideration:

- Swipe between players
- Large tap targets for number inputs
- Auto-advance to next player after completing each card
- Progress indicator: "8 of 14 players done"

Step 4 — Review & Submit

- Summary table of all entered stats
- Any missing required fields highlighted
- "Submit Match Data" button

On submit:

- All stats written to Firestore matchStats collection
- enteredBy: coachId
- verificationStatus: 'coach_verified'
- Performance scores recalculated for all affected athletes
- Coach sees: "Match saved. Scores updated for 14 athletes. ■"

Draft Save

- Every 30 seconds, auto-save as draft
- Coach can close and return to complete entry

- Draft indicator: "Draft saved 2 min ago"

Match History

- Full list of all matches entered by this coach
 - Filter by competition, season, date range
 - Tap any match to view or edit the stats
-
-

COACH FEATURE 5 — Training & Drills

Purpose

Log training sessions, track attendance and feed consistency scores with real session data.

Drills Library

- Pre-built library of football drills (categorised by: fitness, technical, tactical, set pieces, goalkeeper)
- Each drill: name, description, duration, difficulty, diagram
- Coach can add custom drills to their personal library
- Search and filter drills

Create Training Session

Date & time: [datetime picker]
Duration: [minutes]
Location: [text input]
Session type: [Training / Friendly / Analysis]
Drills selected: [multi-select from library]
Athletes attending: [squad checklist]
Notes: [text area]

Mark Attendance

- After session: coach opens session and marks each athlete as Present / Absent / Late / Injured
- Attendance feeds directly into consistency score calculation
- Chronic absences trigger a flag in the Performance Analytics tab

Session History

- Full log of all training sessions
 - Attendance rate per athlete across all sessions
 - Most attended drill categories
-
-

COACH FEATURE 6 — Schedule Management

Purpose

Single calendar view of all football activity — matches and training.

Calendar Views

- Month view (default)
- Week view
- List view (for mobile)

Event Types

- ■ Match (shows opponent, home/away, result if played)
- ■ Training (shows session type, location)
- ■ Analysis Session
- ■ Cup / Tournament

Add Event

- Tap any date to add event
- Select type, fill details, select attending athletes
- Events auto-sync to all athletes' schedule view

Reminders

- Automatic SMS reminder to squad 24 hours before match:

TalentGraph: Reminder – [Club] vs [Opponent]
tomorrow at [Time], [Location].
Reply CONFIRM to confirm attendance.

- Athlete replies CONFIRM → attendance marked
 - Coach sees attendance confirmation list in real time
-
-

COACH FEATURE 7 — Performance Analytics

Purpose

Deep performance intelligence for every athlete in the squad.

Not just numbers — actionable insight.

Individual Athlete View

Score cards (top row):

[Performance: 78/100] [Efficiency: 65/100]
[Consistency: 71/100] [Risk: 23/100 (Low)]
[Composite Index: 72/100]

Radar Charts (3 tabs):

- Technical: Composure, Crossing, Dribbling, Finishing, First Touch, Free Kick, Long Shots, Long Throws, Marking, Passing, Penalty Taking, Tackling, Technique, Creativity, Flair
- Mental: Aggression, Anticipation, Bravery, Concentration, Decisions, Determination, Influence, Off the Ball, Positioning, Teamwork, Work Rate

- Physical: Acceleration, Heading, Agility, Balance, Jumping, Natural Fitness, Pace, Stamina, Strength

Performance Trend (line chart):

- Composite score over last 12 months
- Overlay: minutes played (to show correlation)

Match-by-Match Ratings (bar chart):

- Rating per match over the season
- Average line overlaid
- Highlight best and worst performances

Discipline Timeline:

- Cards per match visualised on a timeline
- Card accumulation warnings (e.g. 4 yellows = next ban)

Consistency Deep Dive:

- Standard deviation of match ratings
- Attendance rate (training + matches)
- Minutes played vs available minutes ratio

Injury & Availability:

- Current status: Available / Injured / Suspended
- History of missed games with reason

Squad Overview Analytics

Team-level metrics:

- Squad average composite score (trend over season)
- Score distribution chart (how many athletes at each band)
- Top 5 performers (leaderboard with scores)
- Most improved this month
- Flagged athletes (High/Very High risk — with alert reasons)
- Position coverage heat map

Season statistics:

- Goals scored / conceded
- Wins / Draws / Losses
- Clean sheets
- Top scorer, top assist, most appearances

Export

- Any individual analytics page exportable as PDF
- Squad analytics exportable as season report PDF
- Used for: board presentations, parent meetings, FKF submissions, partnership proposals

COACH FEATURE 8 — Communications (Unified Inbox)

Purpose

All coach communications in one place. No switching between WhatsApp and the platform. Everything logged, searchable, auditable.

Inbox Tabs

Tab 1 — Athletes

- Conversations with athletes in the squad
- Message any athlete directly
- Athlete replies received here
- Unread indicator per conversation

Tab 2 — Club Admin

- Messages from the club admin
- Coach can send reports and updates to admin
- Club announcements appear here

Tab 3 — Analyst

- Collaboration thread with the club analyst
- Share match data, receive analysis reports
- Attach performance data to messages

Tab 4 — Notifications

- System notifications: verifications, match reminders, squad changes, score updates
- Mark as read individually or all at once

Message Composer

To: [select from role list]
Subject: [optional for direct messages]
Message: [text area, 1000 char max]
Attach: [athlete profile link | match report | performance PDF]
Send

Broadcast Message (Coach → Full Squad)

- "Message All" button at top of Athletes tab
- Write once, send to all squad athletes simultaneously
- Delivered as in-app notification + SMS to each athlete
- Used for: match announcements, training changes, motivational messages

COACH FEATURE 9 — Club Dashboard

Purpose

Coaches affiliated with a club get a club-level view that the club admin can also see. Keeps everyone aligned.

Contents

- Club profile: name, badge, league, location, season
 - Full squad list (all athletes linked to the club)
 - Fixture list: all matches this season
 - Season statistics: aggregated team performance
 - Coaching staff: all coaches and analysts at the club
 - Club chat: real-time group chat (see Part 6)
-

PART 4 — SCOUT DASHBOARD (FULL SPECIFICATION)

Overview

The scout dashboard is an intelligence and action platform.

A scout arrives knowing what they want. The platform's job is to help them find it faster, trust it more and act on it immediately.

World-class benchmark: feel like Wyscout built for African football, priced for the Kenyan market.

Scout Sidebar Navigation

- Search Athletes

■ Saved Searches

■ Talent Marketplace

■ ■ Compare Athletes

■ Scouting Reports

■ Messages

■ My Activity

■ ■ Settings
- ← badge shows new matches

← badge shows athletes in compare bar

← badge shows unread count

SCOUT FEATURE 1 — Advanced Athlete Search

Purpose

The core daily tool. A scout should be able to go from zero to a precise shortlist in under 3 minutes.

Search Architecture

Search bar:

- Searches: athlete name, club name, location
- Debounced 300ms
- Autocomplete suggestions after 2 characters
- Recent searches shown on focus (last 5)

Filter Panel (always visible, never hidden):

Filter	Type	Detail
Position	Multi-select chips	GK, CB, LB, RB, CDM, CM, CAM, LW, RW, ST
Location	Searchable dropdown	All 47 Kenya counties + "International"
Age Range	Dual handle slider	15–35, shows selected range live
Composite Score	Dual handle slider	0–100 with color band preview

Filter	Type	Detail
Risk Band	Radio group	■ Low / ■ Moderate / ■ High / ■ Very High
Consistency	Dropdown	Poor / Average / Good / Excellent
Verification	Toggle	All / Verified Only
Actively Looking	Toggle	All / Looking Only
Club Status	Toggle	All / Has Club / Unattached
Data Source	Toggle	All / Coach Verified Only / Self Reported
Dominant Foot	Toggle	All / Left / Right / Both

Active filters strip:

- Shows all active filters as removable chips
- "Clear All" button
- Filter count badge: "6 filters active"

Results Display

Card layout (default):

■ [Photo]

James Otieno

■

■

■ Striker · 19 yrs

■

■ Nairobi · Gor Mahia

■

■

■ COMPOSITE

RISK

CONSIST.

■

■ [78]

■ Low

Good

■

■

■ [+ Compare]

[Save]

[Profile→]

■

List layout (toggle):

- Compact rows for scanning many athletes quickly
- Same data, less visual space

Sort options:

- Composite Score (highest first) — default
- Most Recently Added
- Alphabetical
- Youngest First
- Risk Score (lowest first)

Results header:

247 athletes found · Page 1 of 11 · [Sort▼] [List/Grid toggle]

Pagination:

- 24 per page
- Page numbers + prev/next
- "Load More" option on mobile

No results state:

- "No athletes match your current filters"
- Show which filters are most restrictive
- Suggest: "Try removing the Verified Only filter (adds ~45 athletes)"

URL State

All filters serialised to URL params:

```
/scout/search?positions=ST,LW&county=Nairobi&age_min=17
&age_max=23&score_min=65&verified=true
```

Fully shareable. Browser back button restores filters.

Firestore Query Strategy

```
// Primary query using available indexes
let q = query(
  collection(db, 'athletes'),
  where('nominalPosition', 'in', positions),
  where('county', '==', county),
  where('verificationStatus', '==', 'coach_verified'),
  orderBy('compositeScore', 'desc'),
  limit(24)
)

// Range filters (score, age) applied client-side
// after initial Firestore fetch to avoid
// compound index explosion
const results = (await getDocs(q)).docs
  .map(d => d.data())
  .filter(a =>
    a.compositeScore >= scoreMin &&
    a.compositeScore <= scoreMax &&
    a.age >= ageMin && a.age <= ageMax
  )
```

Required Firestore Indexes

```
athletes: nominalPosition ASC, compositeScore DESC
athletes: county ASC, compositeScore DESC
athletes: verificationStatus ASC, compositeScore DESC
athletes: activelyLooking ASC, compositeScore DESC
athletes: county ASC, nominalPosition ASC, compositeScore DESC
```

SCOUT FEATURE 2 — Saved Search Alerts

Purpose

A scout should never miss a new athlete who fits their criteria.

This feature works while the scout sleeps.

Saving a Search

- Persistent "■ Save This Search" button on search page
- Only active when at least one filter is set
- Modal:

```
Search Name: [ e.g. "Left backs Kisumu U21" ]
Notifications: [ SMS + In-app ▼ ] [ In-app only ] [ Off ]
[ Save Search ]
```

- On save: confirmation toast "Search saved ■"

Saved Searches Page

Table columns:

Name | Filters Summary | Saved | Last Match | Matches Found | Alerts | Actions

Filters Summary — human-readable:

"ST · Nairobi · Age 17-21 · Score 70+ · Verified Only"

Actions:

-  Run Search (opens search with these filters)
-  Rename
-  Toggle Alerts
-  Delete

Empty state:

"No saved searches yet. Run a search and save it to get alerts."

Alert Engine (Backend)**Trigger 1 — New athlete registers:**

```
// Cloud Function: onAthleteCreate
exports.onAthleteCreate = functions.firestore
  .document('athletes/{athleteId}')
  .onCreate(async (snap, context) => {
    const athlete = snap.data()
    await matchAgainstAllSavedSearches(athlete)
  })
```

Trigger 2 — Athlete profile updated:

```
// Cloud Function: onAthleteUpdate
exports.onAthleteUpdate = functions.firestore
  .document('athletes/{athleteId}')
  .onUpdate(async (change, context) => {
    const newAthlete = change.after.data()
    const oldAthlete = change.before.data()

    // Only run matching if relevant fields changed
    const relevantFields = ['nominalPosition', 'county',
      'age', 'compositeScore', 'verificationStatus',
      'activelyLooking', 'riskBand']

    const changed = relevantFields.some(f =>
      newAthlete[f] !== oldAthlete[f]
    )

    if (changed) {
      await matchAgainstAllSavedSearches(newAthlete, oldAthlete)
    }
  })
```

Matching logic:

```
async function matchAgainstAllSavedSearches(athlete, previousAthlete = null) {
  const searches = await getAllActiveSavedSearches()

  for (const search of searches) {
    const matchesNow = athleteMatchesFilters(athlete, search.filters)
    const matchedBefore = previousAthlete
      ? athleteMatchesFilters(previousAthlete, search.filters)
      : false

    // Only notify if newly matches (not already a match)
    if (matchesNow && !matchedBefore) {
```

In-app notification:

SMS via Africa's Talking:

Alert deduplication:

Never send the same scout an alert for the same athlete on the same saved search twice, even if the athlete updates their profile multiple times.

SCOUT FEATURE 3 — Talent Marketplace

Purpose

Athletes who want to be found. Scouts who want to find them.
A focused feed with zero noise.

Athlete Opt-In (Athlete Side)

Athletes toggle "Actively Looking" on their profile:

```
I am actively looking for:
[ ] Trial opportunity
[ ] Permanent club
[ ] Academy registration
[ ] International exposure
```

Available from: [date picker]
Target location: [county dropdown / "Anywhere"]
Short message to scouts: [150 char max]

Marketplace Feed Layout

Each card:

```
■ [Photo]    Brian Wafula      ■ ■
■           Goalkeeper · 22 yrs    ■
■           Mombasa · Unattached  ■
■                                     ■
■ "Looking for trial or academy   ■
■ opportunity. Available now."    ■
■                                     ■
■ COMPOSITE    RISK            AVAILABLE ■
■ [ 71 ]      ■ Low            Immediately ■
■                                     ■
```

Feed controls:

- Sort: Newest / Composite Score / Closest Match
- Filters: Position, County, Age, Score range,

Verified only, Unattached only, Looking for (type)

Feed freshness:

- "New this week" tag on athletes who joined the feed in the last 7 days
- Real-time updates — new athletes appear without refresh

Saved Athletes

Save button on every card:

- Instantly bookmarks athlete
- Saved list accessible from sidebar

Saved Athletes page:

Table columns:

Photo | Name | Position | Composite | Saved On | Notes | Actions

Private Notes:

- Only visible to the scout who wrote them
- Max 500 characters
- Rich enough for: "Saw play vs Tusker Jan 2026.

Strong in the air. Needs work on left foot.

Follow up in March."

- Notes export with scouting report (Feature 5)

SCOUT FEATURE 4 — Athlete Comparison Tool

Purpose

A scout shortlisting for one position needs to make a binary decision. This tool makes that decision defensible, shareable and documented.

Compare Bar (Persistent Bottom Bar)

- Appears as soon as first athlete added to compare
- Stays visible while browsing search, marketplace, profiles
- Maximum 5 athletes
- "Add to Compare" button on all athlete cards

- When 5 reached: other "Add to Compare" buttons show "Remove one to add another"
- Persists across page navigation within the session
- Cleared on logout or manual clear

Comparison Table (Full Screen)

Header row:

Attribute	James Otieno	Brian Wafula	Moses Kamau

Category sections:

OVERVIEW

Age	19	22	20
Position	ST	GK	CM
County	Nairobi	Mombasa	Kisumu
Club	Gor Mahia	Unattached	AFC Leopards
Verified			
Actively Looking	No	Yes	No

PERFORMANCE SCORES

Composite Index	[78]	[71]	[69]
Performance	82/100	74/100	65/100
Efficiency	71/100	68/100	72/100
Consistency	75/100	70/100	63/100
Risk Score	23 Low	31 Mod	44 Mod

PHYSICAL

Height	178 cm	189 cm	174 cm
Weight	73 kg	84 kg	70 kg
Dominant Foot	Right	Both	Left

SEASON STATS

Appearances	18	16	22
Goals	11	0	4
Assists	3	1	7
Minutes Played	1,520	1,380	1,890
Rating Average	7.4	7.1	6.8

DISCIPLINE

Yellow Cards	2	1	4
Red Cards	0	0	1
Consistency Rtg	Good	Good	Average

Best value per row highlighted in green automatically.

Comparison Actions

- Remove athlete: X on column header
- Replace athlete: click name to search for replacement
- Export: generates PDF report (Feature 5)
- Share: copy URL with comparison state

URL State

/scout/compare?ids=athleteId1,athleteId2,athleteId3

SCOUT FEATURE 5 — Scouting Report Export

Purpose

A document a scout can send to a director of football, present in a board meeting or attach to a transfer proposal. Must look like it came from a professional agency.

Single Athlete Report (4 Pages)

- All athletes listed with photos and composite scores
- Generated date and scout name

Comparison table pages:

- Full table from Feature 4 across two pages

Individual summary page per athlete:

- 1-page snapshot of each athlete in the comparison

Technical Implementation

```
// Server-side PDF generation (Puppeteer)
// POST /api/reports/generate

async function generateScoutingReport(athleteId, scoutId) {
  // 1. Fetch all athlete data
  const athlete = await getFullAthleteData(athleteId)
  const scoutNotes = await getScoutNotes(scoutId, athleteId)

  // 2. Render HTML template with data
  const html = renderReportTemplate(athlete, scoutNotes)

  // 3. Launch headless browser
  const browser = await puppeteer.launch()
  const page = await browser.newPage()
  await page.setContent(html, { waitUntil: 'networkidle0' })

  // 4. Generate PDF
  const pdf = await page.pdf({
    format: 'A4',
    printBackground: true,
    margin: { top: '0', bottom: '0', left: '0', right: '0' }
  })

  await browser.close()

  // 5. Upload to Firebase Storage with 24hr expiry
  const fileName = `reports/TG_Report_${athlete.name}_${Date.now()}.pdf`
  const fileRef = ref(storage, fileName)
  await uploadBytes(fileRef, pdf)

  // 6. Get download URL
  const url = await getDownloadURL(fileRef)

  // 7. Log report generation
  await logReportGeneration(scoutId, athleteId, url)

  return { url, expiresAt: addHours(new Date(), 24) }
}
```

File cleanup:

- Firebase Cloud Function runs daily
- Deletes report files older than 24 hours

- ## SCOUT FEATURE 6 — Messages (Two-Layer System)

Professional communication that keeps interactions on-platform, documented and spam-free.

10:45 AM

Scout: [compose message...]

[Send]

Read receipts:

- ✓ Sent
- ✓✓ Delivered
- ✓✓ (blue) Read

Monthly send limit display:

■ Messages this month: 3 / 5 used
Resets on: 15 Feb 2026

Limit reached state:

Message limit reached for this month.
Resets on 15 Feb 2026.
[Upgrade for more messages]

Spam reporting:

- Three-dot menu on any message: "Report as Spam"
- Reported message flagged for admin review
- If 3 athletes report same scout: account flagged,

founder notified

Messages Inbox Layout

Two tabs:**Requests tab:**

- Pending / Accepted / Declined requests
- Sorted by most recent

Messages tab:

- Active conversation threads
- Sorted by last message
- Unread count badge per thread

SCOUT FEATURE 7 — My Activity

Purpose

A scout's personal dashboard. Track what they have done, what is outstanding and what insights the platform gives back.

Contents

This Month Summary:

[Athletes Viewed: 47] [Searches Run: 12]
[Messages Sent: 3] [Reports Generated: 4]
[Saved Searches: 7] [Athletes Saved: 23]

Recent Activity Feed:

■ You generated a report for James Otieno 2h ago

- Brian Wafula replied to your message

■ New match: "Left backs Kisumu" alert

■ You viewed Moses Kamau's profile
- Yesterday

Yesterday

2 days ago

Saved Athletes (quick access):

- Last 5 saved athletes with notes preview

Active Alerts:

- All saved searches with active notifications
 - Last match date for each
-

PART 5 — ATHLETE DASHBOARD (OVERVIEW)

Purpose

The athlete dashboard is the most personal part of the platform.

An athlete should feel pride when they open it.

Their profile is their football CV. It must look serious.

Athlete Sidebar Navigation

- Home
 - My Profile
 - Edit Profile
 - My Performance
 - Profile Views
 - Alerts
 - Messages
 - My Club
 - Settings
-

Key Athlete Features

Profile Home

- Their composite score displayed large
- Verification status badge (prominent)
- Quick stats: appearances, goals, assists
- "Your profile was viewed X times this week"
- Pending items: verification requests, squad invites, scout messages

Edit Profile

- All physical stats
- Position (primary + alternative)
- Career history (club, season, appearances, goals)
- Attributes (1-10 ratings) — self-reported
- Actively Looking toggle + preferences
- Photo upload

Profile Views (Analytics)

- Total views this week / month
- Views trend chart
- "Scouts have viewed your profile X times this month"
- (Detail of who viewed is a Pro feature)

Messages

- Scout request inbox: accept / decline

- Active conversation threads with scouts
- Messages from coach

My Club

- Current club affiliation
 - Club chat access
 - Squad training schedule
 - Upcoming matches
-

PART 6 — CLUB ADMIN DASHBOARD (OVERVIEW)

Purpose

The club admin is the paying customer and the account owner.

They need control, visibility and ROI on their subscription.

Club Admin Sidebar Navigation

- Overview
 - ■ Club Profile
 - Squad Management
 - ■ ■ Coaching Staff
 - Club Analytics
 - Club Chat
 - Trial Unlocks
 - Billing
 - ■ Settings
-

Key Club Admin Features

Overview

- Active squad count
- Verified athletes %
- Upcoming matches
- Recent scout activity on club athletes
- Subscription status + next billing date

Squad Management

- Full squad list with all athletes
- Add / remove athletes
- View individual athlete profiles
- See which athletes have active scout requests

Coaching Staff

- Add coaches and analysts to the club
- Assign roles: Head Coach / Assistant / Analyst / GK Coach
- Each coach gets Coach Pro access tied to the club account

Club Analytics

- Full team performance stats
- Season summary
- Individual player development tracking
- Export season report PDF

Trial Unlocks

- See all trial unlocks purchased

- Athlete name, unlock date, status

(active / expired / converted to signing)

- Initiate new trial unlock (triggers KES 3,500 STK Push)
- Trial outcome logging: signed / not signed

Billing

- Current plan and price
 - Next billing date
 - Payment history
 - Change M-Pesa number
 - Upgrade / downgrade plan
-

PART 7 — THE COMMUNICATION ECOSYSTEM

How Every Role Communicates With Every Other

This is the connective tissue of the platform.

All communication is on-platform, logged and searchable.

Communication Channel Map

- ATHLETE
- ↓ Coach Messages (squad channel)
 - ↓ Scout Requests + DMs (via request acceptance)
 - ↔ Club Chat (group chat with full club)
 - ← Verification notifications (from coach)
 - ← Match reminders (from coach/system)
 - ← Alert notifications (from system)
- COACH
- ↓ Athlete Messages (squad channel)
 - ↓ Club Admin Messages (club channel)
 - ↓ Analyst Collaboration (shared reports + messages)
 - ↔ Club Chat (group chat)
 - ← Verification requests (from athletes)
 - ← Re-verification alerts (when athlete edits stats)
 - ← Match entry reminders (from system)
- ANALYST
- ↓ Coach Collaboration (data + reports)
 - ↓ Club Admin Reports
 - ↔ Club Chat
 - ← Performance data alerts
- SCOUT
- ↓ Athlete DMs (via request system)
 - ← Club Admin (trial enquiry responses)
 - ← Saved search alerts (from system)
 - ← Message replies (from athletes)
- CLUB ADMIN
- ↓ Coach Messages
 - ↓ Scout Trial Enquiries
 - ↔ Club Chat (admin of the chat)
 - ← Billing notifications (from system)
 - ← Trial unlock confirmations
 - ← Squad change notifications

Club Chat (Real-Time Group Channel)

Every club has one group chat automatically created on registration.

Members:

- Club Admin (always present, moderator)
- All affiliated Coaches (auto-added on joining club)

- All affiliated Analysts (auto-added)
- All Athletes in squad (auto-added on squad join)
- Scouts: NOT included

Features:

- Real-time messaging (Firestore real-time listener)
- Pinned messages (admin only)
- Role badges on messages: [Admin] [Coach] [Analyst] [Athlete]
- Delete own message
- Admin can delete any message or remove member from chat
- Read receipts per message (count of readers)
- Message reactions (👍 👎 🗑️)

SMS notification for pinned messages:

TalentGraph [Gor Mahia]:
Coach pinned a message: "Training moved to
Thursday 4PM, City Stadium."
talentgraph.co.ke/club/chat

Implementation (Firestore Real-Time):

```
// Subscribe to club chat
const messagesQuery = query(
  collection(db, 'clubChats', clubId, 'messages'),
  orderBy('sentAt', 'asc'),
  limitToLast(50)
)

const unsubscribe = onSnapshot(messagesQuery, (snapshot) => {
  snapshot.docChanges().forEach((change) => {
    if (change.type === 'added') {
      appendMessage(change.doc.data())
    }
  })
})
```

Scout ↔ Athlete Communication Protocol

Step 1: Scout finds athlete via search or marketplace
 Step 2: Scout sends formal Scout Request with message
 Step 3: Athlete receives in-app + SMS notification
 Step 4: Athlete accepts or declines
 → Declined: conversation closed
 → Accepted: DM thread opens
 Step 5: Scout and athlete exchange messages
 Step 6: If trial agreed: club admin unlocks athlete
 (KES 3,500 trial unlock)
 Step 7: Trial outcome logged on platform
 Step 8: If signed: transfer facilitation flow
 (2.5% fee for international transfers)

Coach ↔ Athlete Communication Protocol

Coach sends squad invite → Athlete accepts/declines
 Once in squad:

- Coach can message athlete directly
 - Club chat adds athlete automatically
 - Match reminders sent to athlete via SMS
 - Verification notification sent when stats verified
 - Athlete can message coach with questions
-
-

Analyst Role — Full Definition

The analyst role is currently light in the documentation.

Here is the full spec:

What an Analyst Does:

- Enters and analyses match data (same as coach)
- Creates performance reports for the club
- Does NOT have verification rights by default

(club admin can grant this)

- Provides data insights to coaching staff
- Can export analytics for board presentations

Analyst vs Coach Distinction:

- Coach: on the pitch, entering live match data, managing squad relationship
- Analyst: off the pitch, deeper data analysis, report generation, video tagging (future feature)

Analyst Communications:

- Collaboration channel with coaches
 - Reports inbox with club admin
 - Access to all squad performance data
 - Cannot message athletes directly (goes via coach)
-

PART 8 — PARTNERSHIP READINESS

Why This Platform Wins Partnerships

Football Kenya Federation (FKF)

What we offer:

- The most comprehensive verified athlete database in Kenya
- Coach verification audit trail that FKF can trust
- Data format compatible with CAF player registration standards
- NSL and county league coverage no one else has

What we ask:

- Official data partnership designation
- Co-branding on coach verification ("FKF Recognised Platform")
- FKF coach licence integration (auto-verify coaches with FKF licence)
- Joint announcement to NSL and county clubs

Data we share with FKF (free):

- Anonymised aggregate data: position distribution, county coverage, age pyramid, verified athlete count
- Not individual athlete data without consent

CAF (Confederation of African Football)

What we offer:

- Pan-African expansion roadmap (Kenya → East Africa → West Africa → North Africa)
- Standardised athlete data format compatible with CAF player registration
- AFCON and African Champions League data packages

Partnership value:

- CAF endorsement gives platform instant credibility with clubs across 54 countries
- Data licensing deal: \$X per tournament

Sportradar / Stats Perform / Opta

What we offer:

- Ground-level Kenyan football data they cannot collect
- Verified grassroots athlete data (they only cover top leagues)
- Historical data from NSL, county leagues, academies

Commercial terms:

- Annual data licensing deal
- They pay for access to our verified athlete database
- We get distribution to their global clients

Why they need us:

- Sportradar covers KPL but not NSL, county leagues or academies
 - Their data on Kenyan football below top tier is thin
 - We fill that gap with verified, structured data
-

Safaricom (M-Pesa Partnership)**What we offer:**

- M-Pesa as primary payment rail for all transactions
- Case study: Kenya-first fintech integration in sports tech
- Co-marketing opportunity: Safaricom reaches 40M+ Kenyans

What we ask:

- Preferred Daraja API partner status
 - Reduced transaction fees for platform volume
 - Joint marketing (Safaricom Sports programme)
 - Feature in Safaricom developer case studies
-

SportPesa / Betway Kenya (Betting API)**What we offer:**

- KES 50,000–200,000/month API access
- Verified player data for odds calculations
- Historical match data for NSL and county leagues
- AFCON/World Cup tournament packages

What they get:

- More accurate player performance data
- Kenyan football coverage they currently lack
- API with clear pricing and SLA guarantees

Positioning:

- Do not publicly advertise the betting API
 - Keep it as a B2B commercial arrangement
 - Never mention it in athlete-facing communications
-

European Club Scouts (International Market)**What we offer:**

- The Africa talent pipeline they are trying to build manually
- Verified, structured data in a format they understand
- USD pricing that fits their scouting budgets
- Transfer facilitation (2.5% fee)

Target clubs:

- Belgian Pro League (historically active in Africa)
- Dutch Eredivisie (strong African scouting networks)
- Portuguese Primeira Liga (Africa gateway)
- Saudi Pro League (growing African recruitment)

Product positioning for international:

- "The Wyscout of African grassroots football"
 - International profile format on every athlete
 - Reports exportable in UEFA standard format (future)
-

Insurance Partner (For Trial Unlocks)**What we need:**

- Underwriter for 14-day trial insurance

included in KES 3,500 trial unlock

- Coverage: accidental injury during trial period
- Target partners: Jubilee Insurance, CIC Insurance,

AAR Insurance (Kenya)

What they get:

- New micro-insurance product distribution channel
- Volume from trial unlocks as platform scales
- Digital-first product with zero agent cost

This is critical — do not activate trial unlock insurance language until an underwriter is contracted.

PART 9 — TECHNICAL REQUIREMENTS FOR WORLD-CLASS QUALITY

Performance Standards

Page load (LCP): < 2.5 seconds on 3G (Kenyan network)
Search results: < 1.5 seconds
PDF generation: < 8 seconds
Real-time messages: < 500ms delivery
Score recalculation: < 3 seconds after match entry
Uptime target: 99.5% monthly

Mobile Standards

Every single screen must be tested on:

- Samsung Galaxy A series (most common Kenya)
- Tecno and Infinix devices (very common Kenya)
- iPhone SE (smallest supported iPhone)
- Screen sizes: 360px, 390px, 414px minimum

Inputs must work with:

- Swahili keyboard
 - English keyboard
 - Predictive text disabled
-

Offline Capability (Critical for Kenya)

Match data entry must work offline.

A coach should be able to enter a full match result
with no internet connection, have it saved locally,
and sync when connection is restored.

```
// Service Worker + IndexedDB for offline match entry
// When online: sync to Firestore
// When offline: save to IndexedDB queue
// On reconnect: process queue and sync to Firestore
```

Error States (Every Screen Needs These)

Every page must handle:

- No internet connection (with offline-capable fallback)
 - Empty state (no data yet)
 - Loading state (skeleton screens, not spinners)
 - Error state (with retry button and support contact)
 - Partial data (some fields missing, graceful degradation)
-

SMS Reliability

All SMS via Africa's Talking must:

- Retry 3 times on failure
 - Log every send attempt with status
 - Never send duplicate messages
 - Respect opt-out requests immediately
-

PART 10 — BUILD PRIORITY ORDER

Phase 1 — Foundation (Weeks 1-2)

- ✓ Role detection + routing + route protection
- ✓ Feature gating middleware (empty gates, ready for rules)
- ✓ Firestore indexes for search
- ✓ Usage tracking counters

Phase 2 — Coach Dashboard Core (Weeks 3-5)

- ✓ My Squad (list, add, remove)
- ✓ Match Data Entry (mobile-optimised)
- ✓ Automated Verification Flow
- ✓ Basic Performance Analytics

Phase 3 — Scout Dashboard Core (Weeks 6-8)

- ✓ Advanced Athlete Search
- ✓ Athlete Comparison Tool
- ✓ Saved Athletes + Notes

Phase 4 — Communication Layer (Weeks 9-10)

- ✓ Club Chat (real-time)
- ✓ Scout Request System (enhanced)
- ✓ Direct Messages
- ✓ Unified Inboxes (coach + scout)

Phase 5 — Advanced Features (Weeks 11-13)

- ✓ Saved Search Alerts + Alert Engine
- ✓ Talent Marketplace
- ✓ Scouting Report PDF Export
- ✓ Schedule + Training + Drills

Phase 6 — Payments & Launch (Weeks 14-16)

- ✓ Feature gating (founder defines rules)
- ✓ M-Pesa STK Push integration
- ✓ Subscription management
- ✓ Trial Unlock flow
- ✓ SMS notifications (all events)

Phase 7 — Partnership Ready (Post-Launch)

- ✓ API layer (for Sportradar, betting companies)
- ✓ International format (USD pricing, Stripe)
- ✓ FKF data integration
- ✓ Advanced analytics exports

✓ Mobile app (iOS + Android)
